ENFit® Cleaning Procedures

Feeding Tubes with Male ENFit Connectors
(e.g. Nasogastric, Transpyloric, Orogastric, Percutaneous Endoscopic Gastrostomy Tubes and other ENFit devices)

Tips for keeping ENFit feeding tube ports clean. Inspect before you connect!

- Priming Feeding Sets  - Stop priming before fluid reaches the end of the tube.
- ENFit Syringe Draw Up  - Wipe medication and nutrition from tip/outer threads, keep fluids out of dead space before connecting to feeding tube.

For best results, follow these instructions to clean tubes at least once a day or whenever material is visible.

Repeat steps 3 through 6 until cap and tube are thoroughly clean.

* A manual toothbrush is regulated as a medical device intended to remove debris from the teeth in some jurisdictions. Consult your licensed healthcare provider or Risk Manager regarding recommended use for cleaning feeding tube ports. Dispose of single use devices as instructed.
