This meeting will focus on gaining awareness and recognizing the safety benefits of the ISO 80369 compliant connectors; ENFit and NRFit. It will be a “working meeting” as a region for Los Angeles and neighboring areas to collaborate on this patient safety initiative.

Your attendance and representation at the meeting will be valuable. We will further explore how organizations can collaborate as a region to prepare for the transition while discussing the benefits of a broader regional plan for Los Angeles and beyond. Sharing of implementation plans, identified barriers and successes is welcomed.
