

SAVE THE DATE: Children's Hospital of Los Angeles ENFit & NRFit Regional Summit

August 21st, 2018

10:00am-3:00pm

**Hosted by Children's Hospital of Los Angeles
4650 Sunset Blvd. Los Angeles, CA 90027**

You are receiving this invite because you will be impacted by the ENFit transition for enteral feeding systems.

CLICK HERE TO RSVP

WHO SHOULD ATTEND?

Anyone involved in enteral tube feeding or enteral tube medication delivery, including but not limited to:

- Hospital representatives from nursing, pharmacy, nutrition, care management and supply chain
- Home Health Care Agencies – enteral infusion companies and home health nursing agencies
- Retail Pharmacies and Distributors
- Long Term Care Facility employees, Group homes, and other Community agencies
- Primary care providers who have patients receiving enteral tube feedings/medications

MEETING PURPOSE:

This regional meeting is to focus on the new enteral feeding system with the ISO 80369 compliant connectors; ENFit and NRFit.

The international initiative is to focus on patient safety and preventing tubing misconnections. This is an exciting meeting to help introduce you to the products through vendor demonstrations and collaboration with organizations who are going through the transition process.

MEETING DETAILS:

This meeting will cover both ENFit and NRFit. Vendors will be in attendance as well.

Your attendance will be valuable! You will be able to explore how organizations are collaborating with vendors and ideas of how to plan for your journey in the transition. We will further explore how organizations can collaborate as a region to prepare for the transition while discussing the benefits of a broader regional plan for Los Angeles and beyond. Sharing of implementation plans, identified barriers and successes is welcomed.
