

SAVE THE DATE:

ENFit Regional Summit

Hosted by The Indianapolis Coalition for Patient Safety

October 5th, 2018

10:00am-3:00pm

[Click Here to Register](#)

Location: 2055 N. Senate Ave.

Indianapolis, IN 46202 at IU Health

You are receiving this invite because you will be impacted by the ENFit transition for enteral feeding systems.

MEETING PURPOSE:

To improve patient safety and prevent tubing misconnections, manufactures of enteral devices are required to change the way enteral feeding sets and syringes connect to feeding tubes to ISO 80369 compliant connectors -- called ENFit and NRFit.

Your attendance will be valuable!

- Explore how organizations are collaborating with vendors and ideas of how to plan for your journey in the transition.
- Explore how organizations can collaborate as a region to prepare for the transition while discussing the benefits of a broader regional plan for Indianapolis and beyond.
- Share implementation plans, identified barriers and successes.
- Vendors will be in attendance as well.

WHO SHOULD ATTEND?

Anyone involved in enteral tube feeding or enteral tube medication delivery, including but not limited to:

- Hospital representatives from doctors, nursing, pharmacy, dieticians, case managers and supply chain
- Home Health Care Agencies
- Retail Pharmacies
- Long Term Care Facility employees

There is commercial support for this event:
