# **THE UK's NHS ISSUES NRFit® CONVERSION PLANS**

The UK's National Health Service (NHS) has issued a National Patient Safety Alert instructing all relevant NHS-funded providers to transition to NRFit® connectors for all intrathecal and epidural procedures, and delivery of regional blocks. Transition should be completed by 31 January 2025. If not already done, leaders should make it an organizational priority to convert to NRFit devices as soon as practical.
